

GP Net Earnings

NHS England require that the net earnings of doctors engaged in the practice is publicised and the required disclosure is shown below. However, it should be noted that the prescribed method for calculating earnings is potentially misleading because it takes no account of how much time doctors spend working in the practice and should not be used for any judgement about GP earnings, nor to make any comparisons with other practices.

The average earnings before taxation and national Insurance and employee pension costs for GPs working in the Furnace Green Surgery in the last financial year was £66,995. This is for 2 full time GP and 4 part time GPs.
